Solar Input Power(W)	2400W Max	Smart App Control	Y

Complete Home Power Access with Easy Installation

Simplify setup with fewer steps than traditional home power storage. You aren't limited to a costly supplier and can pick your own electrician.

It's also a budget-friendly option that's only 50% the price of traditional home power storage.

Replace Gas Generators, Clean and Easy

Say so long to the gas generator. Power your home with clean energy that connects to your existing inlet box and transfer switch.

Standard AC Output Doubled in One Power Station

Power your entire home with just one power station. You can even run several appliances at once.

- 6000W Output
- 120V/240V Dual-Voltage Output
- 12,000W Output from 2 Parallel Power Stations

Massive Power Capacity with Battery Expansion

Each unit of F3800 has 3.84kWh of capacity. Go even bigger with six expansion batteries for 26.9kWh. For even larger needs, combine two units and stack 12 expansion batteries for a massive 53.8kWh of capacity.

Direct EV Charging

You don't need extra accessories to recharge your EV. Just plug in your EV's charging cable directly into Anker SOLIX F3800.

Power for Everything in Your RV

Anker SOLIX F3800 supports all types of RV power and runs all appliances inside for total peace of mind.
